for a comfortable grip

Eyelet for hanging  
the flashlight

Durable duralumin body  
resistant to moisture

Switch at  
the ending

Glass of resistant  
polycarbonate

3× alkaline  
battery type AAA

### Operating the flashlight and battery replacement

Switch on the flashlight by pressing the button on the flashlight ending.

When changing the batteries, unscrew the flashlight ending, remove the battery holder and insert 3 alkaline batteries type **AAA** (triple-A, LR03). Mind the **correct polarities** which are marked on the top as well as the bottom of the battery holder (two batteries are always pointed in the same direction while one is pointed in the opposite direction).

After that, insert the battery holder back inside the flashlight – in the direction of the arrows on the sides of the holder. Carefully screw back the ending. **Use only alkaline batteries.**

**Do not shine directly into eyes! This is not a toy for children.**

- Length: 105 mm
- Head diameter: 34 mm
- Body diameter: 30 mm
- Weight: 126 g (incl. batteries)

✓ **RoHS**  
**COMPLIANT**
