

FL-3AAA / 14 LED MAGNUM

- Duralumin flashlight with **14 LED** diodes
- **Unbreakable** frontal **polycarbonate glass**
- Dimensions: 30/34 × 105 mm
- Weight: 126 g (with batteries)

Operation

The light can be switched ON/OFF by pressing the switch on the flashlight ending. The flashlight can be carried on a belt using the holster and accompany you anywhere.

Replacement of Batteries

Unscrew the end cover, replace 3 old batteries with 3 new "AAA" batteries, screw the cover tightly. **Use alkaline batteries only!**

Warning

Do not shine directly into eyes!
This is not a toy for children!
If batteries or parts are swallowed see a doctor immediately!

Environmental Protection

Do not dispose of the used batteries as common house garbage. The used batteries can be sent to a recycling station, the special waste collection depot or your dealer.
